### Triple Audit Trail (Original → Canonical → Verdict)

Shows the full pipeline for every triple extracted from the LLM response. Triples marked UNVERIFIABLE\* were present in evidence but had no verdict (e.g. dropped due to LLM output truncation).

### Verdict Legend

| Verdict              | Description                                                            |
|----------------------|------------------------------------------------------------------------|
| CORRECT              | All three components (subject, predicate, object) verified against DB. |
| RULE_VIOLATION       | One or more components contradict DB evidence.                         |
| MULTI_RULE_VIOLATION | Violation spans multiple DB triples simultaneously.                    |
| UNVERIFIABLE         | No usable DB evidence found for any component.                         |
| PREDICATE_MISMATCH   | Subject real, but stated predicate is not a valid relation for it.     |
| FABRICATED_FACT      | Triple asserts a relationship that does not exist anywhere in DB.      |
